MACHINE LEARNING ENGINEER / DATA SCIENTIST

Business-minded Machine Learning Engineer and Data Scientist with over three years' experience building GenAI products and predictive models in HR technology, consulting, and consumer industries. MS in Business Analytics candidate at UCLA Anderson. Expertise in LLM-powered systems, agentic workflows, and end-to-end production delivery. Skilled at turning technical tradeoffs into product decisions with executives and cross-functional partners.

EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT — **Los Angeles, CA**
Master of Science in Business Analytics (MSBA) — **Expected December 2027**
- Customer Analytics, Statistics, Optimization, Prescriptive Models, Competitive Analytics
- Class President; Anderson Merit Fellowship

UNIVERSIDAD DE INGENIERIA Y TECNOLOGIA (UTEC) — **Lima, Peru**
Bachelor of Science in Computer Science — **July 2024**
- Top 10% of class; Academic Excellence Scholarship
- Student Body President, Computer Science (2022)

PROFESSIONAL EXPERIENCE

CREHANA — **Lima, Peru**
Senior Machine Learning Engineer — **February 2025 – September 2026**
- Led end-to-end development of GenAI copilot and agentic systems (LangChain, LangGraph), scaling adoption to 1300+ organizations and 48K+ users across Latin America.
- Cut data-extraction agent failure rate by 25% and drove 9x growth in copilot adoption by redesigning routing, adding reliability safeguards, and monitoring models in production.
- Deployed RAG pipeline with scheduled indexing, ingesting 10K+ documents weekly into 1.2M+ data-point search corpus.
- Partnered with Product, Design, and Data Engineering to prioritize copilot roadmap, presenting technical tradeoffs to three-person executive committee and coordinating work of two ML engineers.

APTIM — **Lima, Peru**
Machine Learning Engineer — **December 2024 – February 2025**
- Designed computer vision intake system (Azure AI Vision), automating document extraction from scanned records in medical recruiting workflow processing ~250 candidates monthly.
- Prototyped delay-risk prediction model for supplier tracking, flagging likely postponements two weeks earlier than manual review.

CANVIA — **Lima, Peru**
Data Scientist — **December 2023 – December 2024**
- Implemented product classification and contract-allocation algorithm for commodity exporter, increasing estimated gross margin by ~55%, cutting operating costs by ~40%, and shrinking planning cycles from two weeks to under 20 minutes.
- Built real-time anomaly detection system (Isolation Forest) for transactions across network of 35 leading Peruvian financial institutions, automatically flagging highest-risk ~2% for review.

BELCORP — **Lima, Peru**
Data Science Intern — **January 2022 – August 2022**
- Developed sales forecasting model for new retail digital channel, improving forecast accuracy by ~30% (wMAPE) versus manual estimates across three brands and 15 product lines.

LEADERSHIP

Python Instructor & Mentor, Lima, Peru — **April 2020 – June 2026**
- Mentored 50+ students through weekly small-group and one-on-one sessions (UTEC TA, AUMJ Peru, independent).

Project Coordinator, Impulso Social (nonprofit), Lima, Peru — **February 2025 – May 2026**
- Co-led six textile workshops for 17 mothers from vulnerable communities, supporting skill-building for local entrepreneurship.

SKILLS

AI & Machine Learning: LLMs and GenAI (OpenAI, Claude, Gemini), agentic systems (LangChain, LangGraph), Retrieval-Augmented Generation (RAG), vector databases (Qdrant), scikit-learn, Natural Language Processing (NLP)
Programming: Python (pandas, NumPy), SQL, R, C++
Analytics: A/B testing, hypothesis testing, forecasting, anomaly detection, classification
Tools & Cloud: AWS, Azure, GCP, Docker, Git, Tableau, Power BI, Excel
Languages: Spanish (native), English (fluent), German (B2)
